

# WildSonic Recorder Service Manual

## Required Resources:

- **Micro SD card:** Any capacity up to 2TB
  - **Recommended:** SanDisk Extreme Pro
    - [SanDisk Extreme Pro 64GB microSDXC UHS-I, V30](#)
    - [SanDisk Extreme Pro 128GB microSDXC UHS-I, V30](#)
    - [SanDisk Extreme Pro 256GB microSDXC UHS-I, V30](#)
- **Micro SD card Reader:**
  - **Recommended:** [SanDisk MobileMate USB 3.0 microSD Card Reader - SDDR-B531-GN6NN](#)
- **21700 Li-ion batteries** x 2 batteries
  - **Recommended:** [AMS NMC 21700 5000mAh \(3c\) Lithium-Ion Battery](#)
- **Battery Charger**
  - **Recommended:** [Nitecore New i4 Battery Charger](#)
- **Large-head Phillips #2 Screwdriver**
- **Dry towel** or moisture-absorbing cloth
- A windows computer / laptop to perform device configuration using the app.

## Precautions Before Opening the Recorder Unit:

### Moisture Removal:

- Ensure to wipe away all moisture from outside of the plastic enclosure.
- Rotate the unit in different directions to remove any hidden moisture around the lid.
- Properly drying the unit is crucial to prevent water damage upon opening.
- Insert silica gel packet(desiccant) to absorb any moisture ingress during installation

## Device Overview:

The Wildsonic Recorder consists of following key components, shown in the figure:

- **Battery Holder:** Designed to power the device using 21700 cell batteries. The holder can accommodate either four (4) or five (5) cells depending on the required configuration. At least 2 cells must be installed for operation.
- **Power Switch:** Used to switch the device *ON* or *OFF*.
- **Main PCB and Power PCB Assembly:** A stack of the main working board and the **Power card**, they perform audio recording and storage to the SD card.

**Fig 1.1 : Key parts of a WildSonic recorder**

## LED Indicators:

LED indicators will be in OFF mode and will activate once STATUS switch is pressed

- **White LEDs:** Power indicators
  - Blinking
    - Low battery
  - ON / OFF state indicates device in ON/OFF state
- **Blue LED:** Activity indicator
  - **Blinking:**
    - Device is still recording
  - **OFF:**
    - The device is in a sleep cycle state
- **Red LED:** Error indicator
  - Indicates an error if **blinking** (SD card is faulty/missing)

**Fig 1.2 : LED indicators on the WildSonic PCB**

WildSonic Recorder		
Quickstart	<ol style="list-style-type: none"> <li>1. Check that the device is <b>OFF</b></li> <li>2. Insert batteries in <b>correct +/- orientation</b></li> <li>3. Insert blank <b>SD</b> card for default settings <b>OR</b> Insert <b>SD</b> card with optional configuration file</li> <li>4. Turn <b>ON</b> the recorder</li> </ol>	
	Guide to LEDs (press <b>STATUS</b> button)	
	ERROR LED (Red)	Off      No error
		On      SD Card faulty or missing
	ACTIVITY LED (Blue)	Off      Not recording
		Blinking      Recording
POWER LED (White)	Off	Recorder is <b>OFF</b>
	On	Recorder is <b>ON</b>
	Blinking	Low battery

## Replacing the Micro SD Card:

1. **Open:** the recorder unit
2. **Power Down:** Ensure the system is powered OFF by the Power switch in OFF position.
3. **Micro SD Card:**
  - Temporarily remove the audio jack connection from the 3.5mm audio port.
  - Remove the old micro SD card from the slot.

**Fig 1.3: Figure to show the key parts for a SD card replacement.**

4. **Adding Configuration file to the New SD Card:**
  - Insert the empty Micro SD card into a Micro SD card reader on your PC.
  - Download the WildSonic Configuration INI File Generator software utility (WildSonic Config App.exe).

[Download WildSonic Config App](#)

  - Open the utility.
  - If unsure, leave the values at default.
  - Set the system time offset (in seconds) based on the time it takes to complete the remaining steps 4-5.
  - Click “Save Config” and select the Micro SD card root directory as the destination folder.

## 5. Final Steps:

- Eject the Micro SD card from your PC.
- Insert the configured Micro SD card into the device's Micro SD card slot.
- Reconnect the Mic audio jack and any other previously disconnected connections.
- Power on the device by pressing the power switch
- The Activity LED (White) should blink.
- If the Error LED (RED) is blinking or ON, power off and then on again. The Activity LED (White) should resume blinking.
- Close the lid and secure the device.

## Replacing the Battery:

- **Clear all extended cables across the boards. *Precaution: Take note which cable is connected to which jack before disconnecting:***
  1. Disconnect the Switch and Battery JST connector from the board.
  2. Disconnect audio jacks.

1. **Replace the batteries:** Insert the battery, following the +/- polarity indicated on the battery holder. *Properly executing this step is crucial to preventing damage to the unit.*

2. **Reconnect cables:**
  - a. Reattach audio jacks.
  - b. Reattach the Switch and Battery JST connector to the board.

Remember to follow these steps carefully to maintain the functionality and longevity of your WildSonic Recorder. 🗣️ 🔧
